DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: Claim 1, line 1 reads:

"A display device for displaying information, comprising a plurality of display"

which is changed to read

—**An electrophoretic** display device for displaying information, comprising a plurality of display—

Also, the abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text and must be titled "Abstract". See the following page:

Abstract

The invention relates to a display device for displaying information comprising a plurality of display elements with an electrophoretic medium, a first electrode (6), a second electrode (6') and a third electrode (7) associated with each display element for receiving a drive signal, and control means for supplying, in correspondence with the information to be displayed, the drive signal to the electrodes for realizing intermediate optical states. In order to omit reset pulses, which cause a temporary blanking of the display device, the electrophoretic medium of the display device comprises two groups of electrophoretic particles, one group of positively charged electrophoretic particles (14) and one group of negatively charged particles (14') and the color of the electrophoretic particles of the first group is equal to the color of the electrophoretic particles of the second group.

Allowable Subject Matter

2. Claims 1-9 are allowed.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Examiner cites the following references as pertinent to the disclosure due to their relevance with electrophoretic display devices.

Bastiaens et al.	U.S. Patent 6,462,859
Jacobson et al.	U.S. Patent 6,538,801
Ikeda et al.	U.S. Patent 6,741,385
Matsuda et al.	U.S. Patent 6,822,783
Liu	USPGPUB 2005/0012707

4. The following is an examiner's statement of reasons for allowance: As to Claim 1, the above cited references have failed to teach: "one group of positively charged electrophoretic particles and one group of negatively charged particles and the color of the electrophoretic particles of the first group being equal to the color of the electrophoretic particles of the second group".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
